

## ***Place Keywords by Country/Territory – Pacific Ocean Great Barrier Reef***

This keyword list contains Pacific Ocean Great Barrier Reef place names of coral reefs, islands, bays and other geographic features in a hierarchical structure. For example, the first name on the list – Anchorsmith Island Reef – is part of Queensland in Australia. The leading label – COUNTRY/TERRITORY – indicates that place names are preceded by their country or territory. The list is sorted alphabetically. The same names are available from “Place Keywords by Ocean – Pacific Ocean / Great Barrier Reef” but in a hierarchy of ocean, seas and region name. Each place name is followed by a unique identifier enclosed in parentheses. The identifier is made up of the latitude and longitude in whole degrees of the place location, followed by a four digit number. The number is used to uniquely identify multiple places that are located at the same latitude and longitude. For example, the first place name “Anchorsmith Island Reef” has a unique identifier of “20S149E0076”. From that we see that Anchorsmith Island Reef is located at 20 degrees south (S) and 149 degrees east (E). It is place number 0076 at that latitude and longitude.

This is a reformatted version of a list that was obtained from ReefBase.
